

Detox Antiox™

Natural support for healthy detoxification

Detox Antiox™ synergistically combines an extensive array of nutrients that combat damaging free radicals, while helping to support the immune system and detoxification of chemicals and heavy metals.

Heavy metal toxicity is becoming a greater concern, due to the increase in environmental and industrial pollutants, combined with modern diets that are insufficient in nutrients to help the body naturally detoxify. Additionally, damaging free radicals accumulate in response to these pollutants, leading to health challenges and a burdened detoxification system.

The liver is the primary organ of detoxification. It relies on an ample supply of antioxidant nutrients to pass toxins through the body's two phases of detoxification. Glutathione is the chief antioxidant that fuels the detoxification pathways and is supported by antioxidant vitamins. Sulfur-containing nutrients and selected minerals are essential for "tagging" the toxins for elimination.

Highlights

- **Vitamins C and E** are two chief antioxidant vitamins that function synergistically to protect cell membranes and DNA from the damaging effects of toxins and heavy metals.
- **Alpha Lipoic Acid** regenerates vitamins C and E to prolong their activity. It also supplies sulfur molecules, which support both phases of liver detoxification.
- **N-Acetyl-Cysteine (NAC)** is a foundational precursor to glutathione and helps to boost the detoxification and elimination of mercury.
- **Selenium, L-leucine & NAC** help to protect the central nervous system from potential mercury build-up by preventing its absorption and aiding in its excretion.
- **Chelated minerals bound to methionine** support the removal of heavy metals and provide important cofactors for phase 2 liver detoxification, where the liver cells add another substance to a toxin to render it less harmful.
- **Grape seed extract and green tea extract** are potent antioxidants also known for their ability to protect against heavy metal build-up.
- **Curcumin** is not only a powerful antioxidant, but it also enhances the absorption and antioxidant activity of green tea extract.

Recommended Use:

As a dietary supplement, take two capsules per day with meals, or as directed by your health care practitioner.

Detox Antiox™ is beneficial for:

- Boosting detoxification pathways
- Protection against heavy metal absorption
- Supporting the safe and natural elimination of toxins and heavy metals
- Increasing antioxidant activity
- Providing precursors and cofactors for detoxification nutrients
- Supporting healthy levels of glutathione
- Protecting the central nervous system from toxins
- Supporting the immune system
