

Tegrice[®] Colostrum

Natural support for immune function

Tegrice[®] Colostrum is a novel nutraceutical designed to enhance general immune function and to help promote a healthy digestive system.* Colostrum is an exceptional nutritional substance produced by mothers for their newborns that offers natural support and nourishment for the immune system. For centuries many cultures have used colostrum for natural health and wellness, as it provides a perfect combination of many critical immune-supportive nutrients.

Quality colostrum from America's heartland

Tegrice[®] Colostrum is manufactured using the latest technology in order to produce a pure, potent colostrum that can support optimum immune function and intestinal health.* This technology enables quality colostrum to be created with precision, resulting in a consistent and verifiable combination of immune and growth factors including immunoglobulins, amino acids and other important nutrients. As an essential part of a healthy immune system, immunoglobulins work by neutralizing foreign substances. Amino acids serve as protein building blocks for the strength, repair, and building of muscles, and are necessary to support a healthy digestive system and overall health.

What makes Tegrice[®] Colostrum unique?

Unlike other brands, Tegrice[®] Colostrum comes from healthy, nutritionally-supplemented cattle raised in the United States on USDA and FDA certified dairy farms. These cattle are carefully fed a scientifically designed diet that contains the proper balance of legumes and grasses, along with important minerals to ensure consistently high potency colostrum.
